Installation & Training

With knowledge comes power. Geo Spa Fitness has a commitment to the ongoing success of every project has resulted in the creation of the GeoSpa-Institute and the adoption of the Technogym E-Learning platform. These are on-line cutting edge learning tool is designed to help empower the Spa & Wellness team.

Our approach works to ensure that the spa team can apply & develop knowledge, as well as impart their knowledge to the end user. This in turn will affect the reputation of the facility . A well informed team results in a quality service provider

Geo Spa Fitness has a **Nine Pathways Approach**, There are many areas of consideration when creating a spa & wellness facility. In order to add clarity and give direction to the processes of a spa project, Geo Spa Fitness has captured them all in the Nine Pathways Approach.

We apply this approach when partnering world-renowned architects, designers & spa & club consultants.

Spa Wellness Solution Provider

After Sales & Client Care

Our attention to detail works to achieve a superior design, which in turn results in a better performing end product.

This level of attention extends throughout the project from concept, completion and beyond.

Geo Spa Fitness has a mission to help maintain a high level of site care, ultimately contributing to the success of the spa & wellness facility.

Geo Spa Fitness has implemented SAAS (Software as a Support). SAAS works to ease communications, proactively forecasting project needs in advance.

It also provides an overview of the service and performance of equipment after installation. This ensures that our clients are fully informed of every aspect throughout the duration of the project. SAAS is valuable empowerment tool for multiple site projects.

S.a.a.S (Software as a Support) aids efficiency in vital areas towards project completion it helps to:

- Compile a list of the full scope of work.
- Liaise effectively with site team.
- Assess and a record civil works list for site preparation.
- Check for site readiness.
- Coordinate pre-installation checks.
- Record commissioning of equipment.
- Deliver an on-site manual.
- Sign-off of site completion.
- Monitor continued after sales service and maintenance
